

Application for Mining Lease

Mineral Resources Act 1989

Form MMOL-14 Version 7

Permit Application (ID: 10013178) - COMPLETE

Lodged On: 22/12/2025 05:27 PM

PERMIT DETAILS

Permit name:	22.24
Permit type:	Mining Lease - Eluvial, colluvial and alluvial gold, silver and tin
Permit term:	10 Years
Permit subtype:	Eluvial, colluvial and alluvial gold, silver and tin
General locality of the application:	Approximately 111 kilometres southwest of Cooktown.
Specific minerals:	Gold

PERMIT HOLDER DETAILS

Client name	Percent holding	Authorised
WAR (NQ) PTY. LTD.	100.000000000000	Yes

Holder address details:

Holder:	WAR (NQ) PTY. LTD.	Address:	
ACN:		Town/City:	
Email address:		State:	
Business number:		Postcode:	
Mobile number:		Country:	Australia

Applicant or associate disqualified: No

Authorised Holder Representative (AHR) address details:

Name:	Claire Mackney	Address:	PO Box 706
		Town/City:	Mareeba
Email address:		State:	QLD
Business number:		Postcode:	4880
Mobile number:		Country:	Australia

PERMIT AREA

Size of area applied for (ha):	22.2400
Size of surface area applied for (ha):	22.2400
Local government area(s):	Cook Shire Council, Cook Shire Council
Has a datum post been inserted?	Yes
Datum post standard used:	GDA2020
Provide coordinates for the datum post:	-15.9871159, 144.3563685
When was the land marked out?	17/12/2025
Is surface area within the permit area required?	Whole.
Provide width of access (m):	5.00
Provide any relevant information about access including start and end points:	Access commences at gazetted Maytown Road and ends within the mining lease

LAND INFORMATION DETAILS

Does this application involve the surrender of a granted permit in favour of whole or part of this application? No

Is there any restricted land associated with this permit application? No

Is the lease area within the surface of reserve? No

Is the land applied for situated within an area of a greenhouse gas (GHG) permit? No

Overlapping permits

Permit number	Holder	Status
ML 3076	WAR (NQ) PTY. LTD.	GRAN

Constrained lands

Type	Brief definition	Details of constraint
Endangered Regional Ecosystems	Where the application overlaps with a regional ecosystem that is endangered, additional requirements for the Environmental Authority may be required. Remnant 2019 regional ecosystems are vegetation communities in a bioregion that are consistently associated with a particular combination of geology, landform and soil.	For more information please contact the Queensland Herbarium, Department of Environment and Science, Brisbane Botanic Gardens.
RVM category A - vegetation offsets	This layer provides information about vegetation management activities within Queensland for landholders.	For more information please contact Department of Environment and Science.

Unavailable land

Type	Brief definition	Details of constraint
Moratorium Period Current	This land will be unavailable for 2 months after the expiry of the previous exploration permit, or the abandonment of a previous exploration permit application. This land will be made available on the first business day of the month following the end of the 2 calendar month period.	Mineral Resources Act 1989, for more information please contact the Department of Resources.

Land details

Description	Proposed usage	Current usage	Compensation required?
Lot 14 on plan SP250040 - Lands lease Par Palmerville Station	Permit	Grazing	Yes
Lot 14 on plan SP250040 - Lands lease Par Palmerville Station	Access	Grazing	Yes

NATIVE TITLE

Native title process:	Right to Negotiate
Determined native title claim:	Yes

OBLIGATIONS

As the authorised holder representative, I understand and agree to the obligations associated with the permit: Yes

PAYMENT DETAILS

Fee type	Details	Amount (\$)
ADVREVDL	Native title determined land advertisement	0.00
APPMLECAGECAT	Mining Lease - Eluvial, colluvial and alluvial gold, silver and tin	930.50
Total Fee:		930.50

Adjoining land information details for mining lease applications

In this worksheet, input the **land information details** that will be included in your new mining lease application. The column headings with * are mandatory and require data to be completed either by selection of an item from a pick-list or entering some texts. You can 'copy and paste' multiple items in the same column. Each individual cell will give you instruction on how to enter the correct data.

MINING LEASE WORK PROGRAM

Applicant:

WAR (NQ) Pty Ltd

Permit Name:

Brumby

Permit Term applied for:

10 years

When is mining going to start?

Work is proposed to commence as soon as practical following grant.

Permit Term Justification:

A term of 10 years is applied for to allow for the completion of production for already granted permits and the commencement and working of this permit and other applications being made around the same time (give or take a few days). The term also allows for finalisation of rehabilitation for this permit.

Permit Size and Shape (attach maps):

An area of 22.24 hectares is applied for with this application. This area is undertaken as an extension to ML 3076 taking up tributaries of the North Palmer River.

Minerals Sought:

Gold

Other Purposes Sought:

N/A

Mineralisation/Tonnes/Banked cubic metres (BCM); Grade:

The alluvial channels provide for approximately 6,500m³ of alluvial wash located in the area of the North Palmer River tributaries under application. Additional resources are likely to be located in the eluvial terraces outside of the river.

Mining Methodology:

Mining is by semi-mobile plant. Trommel. Material is carted from the river to the plant site for processing and returned to the river from there. Excavator is used to extract wash, dump truck takes the material to the plant, a second excavator feeds the plant.

The plant is capable of processing 80t an hour of wash without losing gold. The wash put through is variable but work on the remaining leases is anticipated to be finished in 3 years. Rehabilitation monitoring will occur for the remainder of the term.

Minimum Mining Rate (tonnes or BCM per hrs/days/years):

The plant is capable of processing 80t an hour of wash without losing gold. The daily wash throughput is variable depending on the quality of the wash and other determining factors.

MINING LEASE WORK PROGRAM

Infrastructure:

No Infrastructure will be located within the boundaries of this permit.

Plant/Equipment:

the below listed plant and equipment located on the mining leases in use in the operations.

- 100Ton per hr. Gold Trommel
- Hitachi AH500 Articulated Dump Truck
- Hitachi ZX330LC-3 Hydraulic Excavator
- Hyundai HL770-9 Wheel Loader
- Cat D8L Dozer
- Water pumps
- Gensets
- Miscellaneous hoses

extensive machinery and equipment for use in their road contracts which can be called upon as necessary.

Mine Closure/Rehabilitation:

Rehabilitation is progressive as work moves through the river. The wet season each year aids in recontouring. Rehabilitation is planned to be finalised by the time the permits expire.

Project Considerations

Other Permits in Project/Related Leases:

ML 40079, ML 3076, ML 3077, ML 6719 are current granted leases. ML 40079 is an infrastructure lease being retained for the water storage on site.

ML 100497 was applied for on 19 December 2025 to cover the off-lease camp. ML 100499 and ML 100501 were applied for on 22 December 2025 to cover additional mineralised areas.

Project production (projected per annum/life):

The project production is projected to be approximately 40,000m³ each year when weather and access permits.

Human resources committed to the project:

The operation is ideally a 2 person operation, however it has been working successfully as a 1 person operation for the last couple of years. There are positive relationships with neighbouring permit holders, and on occasion they assist as needed.

Dear Sir/Madam,

STATEMENT DETAILING ADJOINING LAND TENURE – BRUMBY - WAR (NQ) PTY LTD

I act on behalf of WAR (NQ) Pty Ltd.

The Brumby application is located approximately 111 kilometres southwest of Cooktown over lot 14 on SP250040, Palmerville Station with access running through the Palmer Goldfields Resource Reserve.

An area of 22.24 hectares more or less is being applied over the identified resource.

The application is wholly within the Cook Shire Council boundary. The attached table provides co-ordinates of boundary posts as taken at time of marking. The datum/reference point is located at - 15.9871159, 144.3563685.

The application is intended to abutt ML 3076 on the north eastern side.

Please contact me on [REDACTED] if you require further information in relation to this statement.

Yours sincerely

[REDACTED]

Claire Mackney
Senior Tenement Manager

Hi [REDACTED]

Apologies for the delayed response. Please find attached the following.

1. Updated shapefiles for all 3 permits to indicate the access amended to come from the South.
2. Updated GeoResGlobe Maps for all 3 permits
3. Updated Land Details spreadsheets for all 3 permits

Please let me know if you require any further information to progress the applications.

Regards

OFFICIAL

Good afternoon Claire,

Following up please on the status of lodgement of varied access descriptions for MLs 100503, [REDACTED]

Are you able to provide a timeframe? There are a number of ML application assessments that cannot be started or finalised until the access descriptions for each ML is appropriate.

Regards,

Subject: War NQ - ML applications - vary access through the PGRR

OFFICIAL

Good afternoon Claire,

As discussed today, we will await the lodgement of varied access descriptions for MLs 100503, [REDACTED]

For the assessments of War (NQ) Pty Ltd ML applications MLs 100503, [REDACTED] it was identified that the access descriptions provided at lodgement are not suitable to enable ML applications to progress. The accesses traverse through the Palmer Goldfield Resources Reserve (PGRR), and QPWS will not provide a compensation agreement for access only as they deem it to be against the management principles under the *Nature Conservation Act 1992* for a reserve to be used as a 'driveway' to a resource authority located on a separate lot on plan.

Once the varied access descriptions are lodged for MLs 100503, [REDACTED] we will also need to review and re-confirm compensation requirements for each ML.

Appreciate your follow up on these ones.

Regards,

Mineral Assessment Hub | Georesources Delivery
